

LINEAR SERIES MUFFLERS

A Muffler in a Tube!

The revolutionary design of the patented *Linear Series* muffler technology has proven to be one of the most significant innovations in marine diesel engine exhaust technology. Through a continuing series of enhancements that began in the early 1990's, the *Linear Series* muffler product line continues to evolve, handling ever-increasing engine horsepower capacities while requiring less and less space. Its reliable performance in a range of diverse applications is unmatched in the industry. Marine Exhaust Systems continues to invest its technological expertise in the *Linear Series* muffler to further improve and develop this innovative product line.

Muffler Sound Quality: Very Quiet - Normal conversation is heard over engine exhaust sound.

Application: In-line, preferably close to the engine with enough room for a surge tube in front.

Very Compact: Excellent for engine re-power.

Real Space Saver: Room for larger fuel tanks and equipment.

Flexibility in Installation: Inlet / Outlet can be adapted for hose connection or glassing to transom.

Horsepower ratings: ~300 - 2200 HP.

Integration: Incorporated with our total exhaust package, raw water bypassing.

Material: Biaxial E-Glass/Vinylester, fire-retardant (Class 1) Hetron FR 998 resin.

Gelcoat Finish Color: White - "Show Quality" finish available upon request.

Hose Connections: 316L Stainless crush resistant rings installed at all muffler hose connections.

Reputation: Nicknamed "The Fish Enticer" - a reputation for producing attractive sound waves.
